

Introducing zero-emissions deliveries to UK cities

Our new **Range Extended Electric Vehicles (REEVs)** operate using groundbreaking hybrid electric vehicle technology, which increases route range whilst maintaining cargo capacity. This minimises the number of vehicles on the road, reducing city centre congestion and improving air quality in urban areas.

400km new round trip range of REEV

15 REEVs deployed so far by UPS in the UK

10k alternative fuel & advanced technology vehicles, including electric vehicles and e-assist cycles, deployed around the world

\$1bn+

invested by UPS since 2009 in alternative fuel, advanced technology vehicles and fuelling stations globally

1m cleaner miles driven each business day by our global fleet of alternative fuel and advanced technology vehicles
